## **DETAILED ACTION**

### ***Response to Amendment***

This office action is in response to amendment filed on November 01, 2006. Original application contained Claims 1-15. Applicant previously cancelled Claims 1-2. Applicant previously amended claims 3-15. Applicant currently cancelled Claims 1-5, 8, and added new Claims 16-20. Applicant amendments filed on November 01, 2006 have been entered and made of record. Therefore, presently pending claims are 6-7, 9-20.

### ***Allowable Subject Matter***

1. Claims 6, 7, and 9-19 are allowable over the prior art of record, and subject to overcoming 35 USC § 112 rejection as discussed below.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16, and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant claimed "when need occurs for an extra secure

Art Unit: 2131

communication”, but need and extra secure communications are relative terms which make the claims indefinite.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant claimed a commencement of extra secure communication, and validating an extra secure communication. It is not clear whether applicant validating the same claimed secure communication or a different secure communication. The relation ship between these secure communications is not clear.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al. (0-7803-3692, IEEE 5/96, hereinafter ‘Chang’).

Regarding Claim 20 Chang teaches and describes a method to authenticate a mobile station in a mobile network, comprising: forming and verifying messages for implementation of authentication of the mobile station with user-to-user data exchange during call setup or during a

call, and key agreement procedures; outputting for a presentation a commencement of extra secure communication to a user of the mobile station; validating an extra secure communication; and transmitting/receiving information as transformed to a radio waves from digital signals and vice versa (Fig.2, page 1254, column 2, last paragraph, and page 1252, Section 1).

### *Conclusion*

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action.
